Geography

In Geography, children will be exploring and examining the UK. The children will explore the capital cities of each country within the UK to identify human and physical features. The children will look at, and create, their own maps of UK using their map skills.

History

In History, children will learn about the past and present of the Cadbury family to learn about local history. They will explore the roles of local historical figures in the journey the iconic Cadbury product. They will explore key historical events from across time.

RE

In RE, children will learn about the bible within the Christianity faith. The children will explore the importance of the bible for Christians and the role it plays within the lives of Christians. From this, the children will learn about different significant religious stories and the morals we can learn from them.

PSHE

In PSHE, children will explore physical and mental health as well safety. They will understand ways in which they can keep themselves healthy and the way they can manage their own emotions and feelings. Further to this, they will identify ways in which they can keep themselves in familiar and unfamiliar places.

Curriculum enrichment

This term, our children will be immersed within theme of chocolate across different subjects and the Cadbury family. It is our intention to visit Cadbury World to enrich the experiences our children have in their local area within our termly theme.

Key texts

Children will look at a range of fiction and non-fiction texts so they can explore different text types. These texts include: poetry, stories with familiar settings, information texts, adventure stories and reports. Some of the texts covered are;

- The tiger who came to tea
- Zog
- Bible stories
- Usborne Atlases

Autumn Term

Our Community

Science

In Science, children will explore plants. They will identify and name a variety of common plants including deciduous and evergreens. Children will identify the different parts of a plant and the function of each part. Children will investigate the growth of seeds through their own experiments over time using different variables.

Computing

In Computing, children will explore and create simple algorithms. From this, they will create their own simple programs. Also, the children will explore a range of algorithms within working games to test and debug.

Design and Technology

In Design and Technology, the children will research, design and create their own pop-up scene. Further to this, they will explore origami and the skills required to create them. The children will use a range of different equipment and skills to perform practical tasks against their design briefs to produce a final product.

Art and Design

In Art and Design, the children will explore the world of colour and tone. The children will explore primary colours and the role they play in creating different colours. They will explore how shades and tones can be created using a range of different materials and mediums. They will then use these techniques to create a final artistic piece to evaluate.

PE

In PE, children will develop their physical skills in active play through development of movement, balance and co-ordination. Children will also be introduced to multi-skills within various games.
